

# Symantec Endpoint Protection

Advanced threat prevention to deliver unmatched defense against malware for laptops, desktops and servers

## Overview

Symantec™ Endpoint Protection combines Symantec AntiVirus™ with advanced threat prevention to deliver an unmatched defense against malware for laptops, desktops, and servers. It provides protection against even the most sophisticated attacks that evade traditional security measures, such as rootkits, zero-day attacks, and mutating spyware.

Symantec Endpoint Protection delivers more than world-class, industry-leading antivirus and antispymware signature-based protection. It also provides advanced threat prevention that protects endpoints from targeted attacks and attacks not seen before. It includes turnkey, proactive technologies that automatically analyze application behaviors and network communications to detect and block suspicious activities, as well as administrative control features that allow you to deny specific device and application activities deemed as high risk for your organization. You can even block specific actions based on the location of the user.

## Key Features

- » Seamlessly integrates essential technologies such as antivirus, antispymware, firewall, intrusion prevention, device and application control.
- » Requires only a single agent that is managed by a single management console.
- » Provides unmatched endpoint protection from the market leader in endpoint security.
- » Enables instant NAC upgrade without additional software deployment for each endpoint.

Symantec Backup Exec™ 12.5

## Key benefits

- » Stops malware such as viruses, worms, Trojans, spyware, adware, bots, zero-day threats and rootkits.
- » Prevents security outbreaks thus reducing administrative overhead.
- » Lowers total cost of ownership for endpoint security.
